Ekeskog belltower 1260

Old pine was feld this winter to become
immortalized in Swedens oldest stolpverk

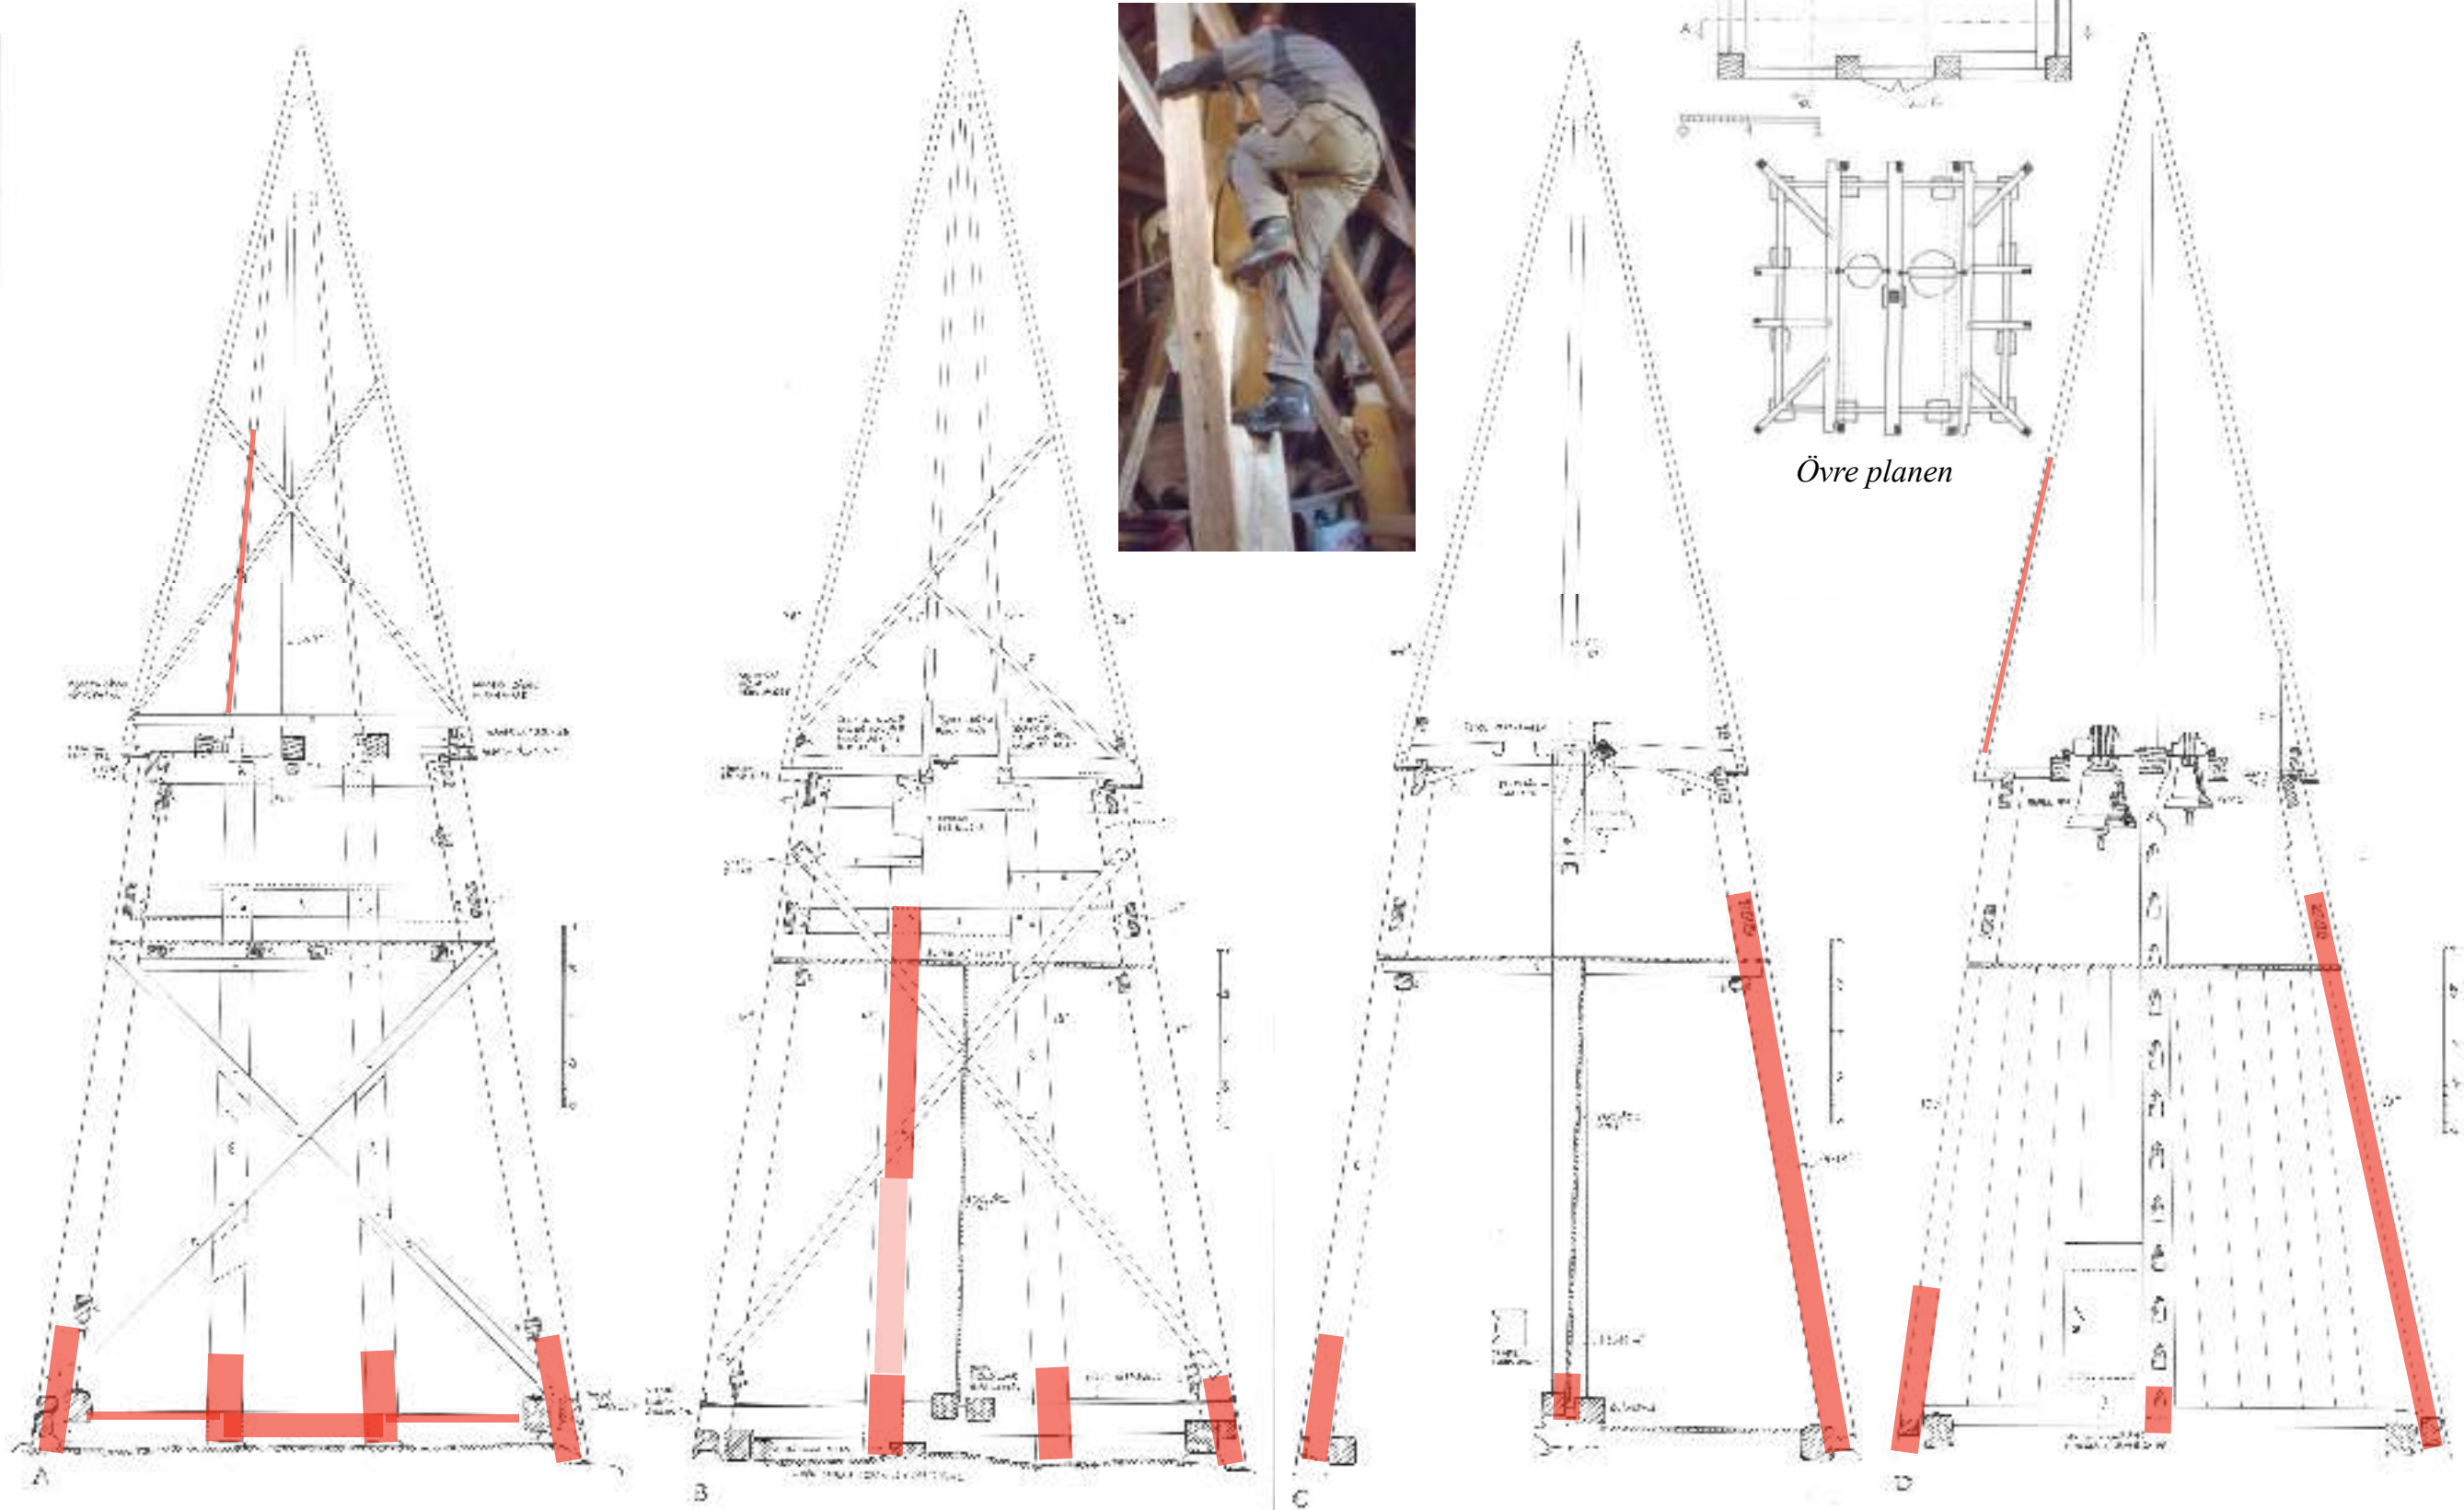

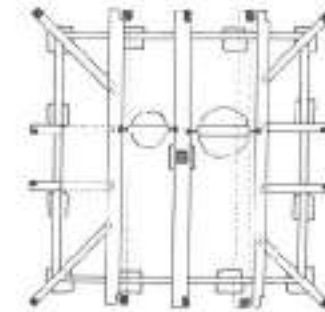

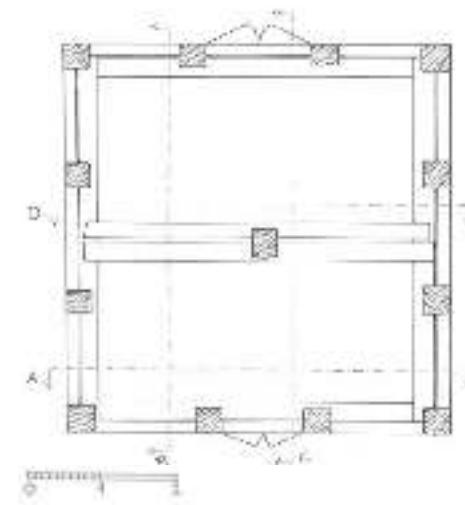

Ekeskog 1260-tal
Sveriges äldsta
stolpverk

Ekeskog bell tower dating 1260s

Standing without sill and with a bear-post to climb the top

Repairing will take place in 2025

Two new 8,5m legs is needed.
Sprätthuggna to the shape from round timber

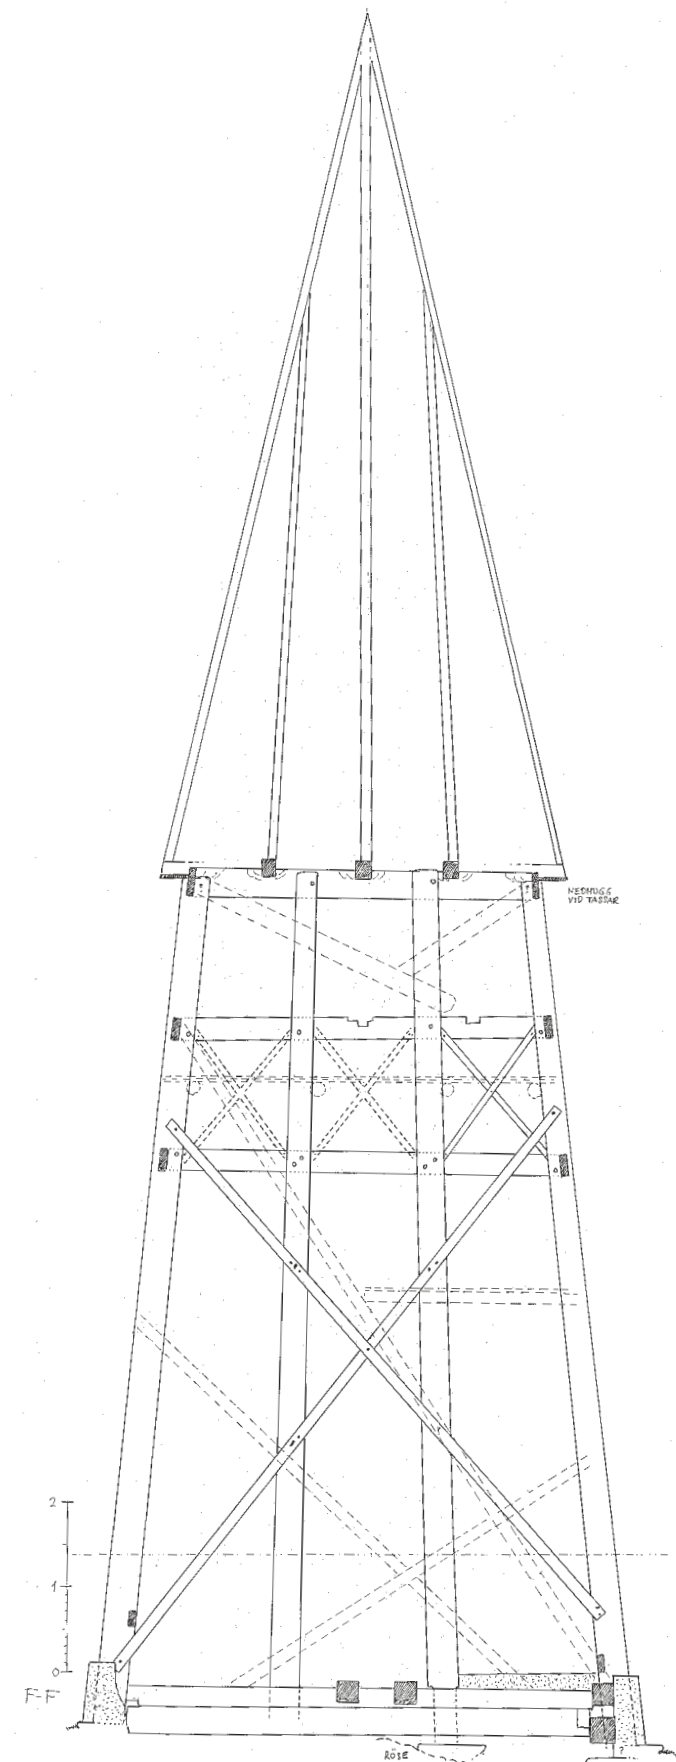

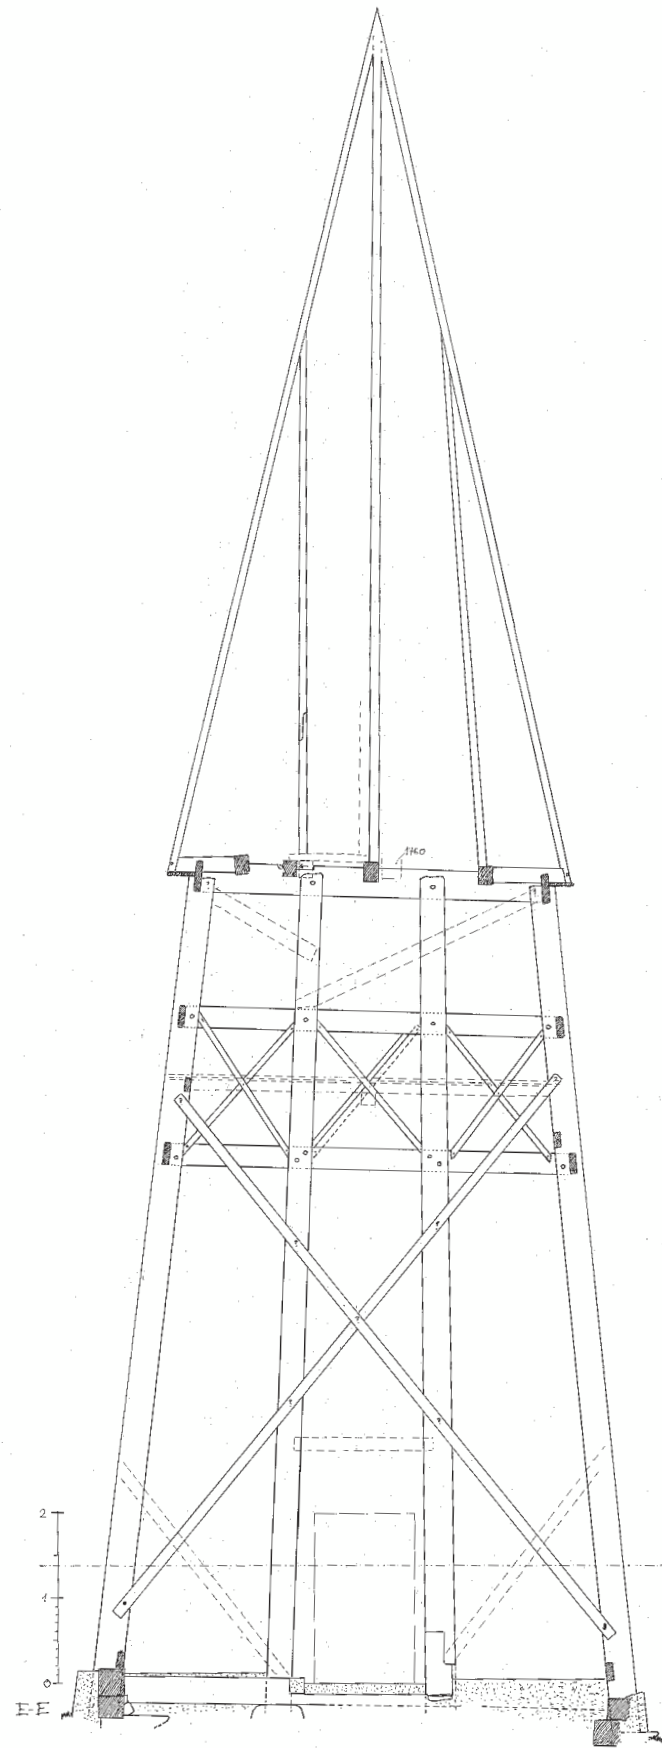

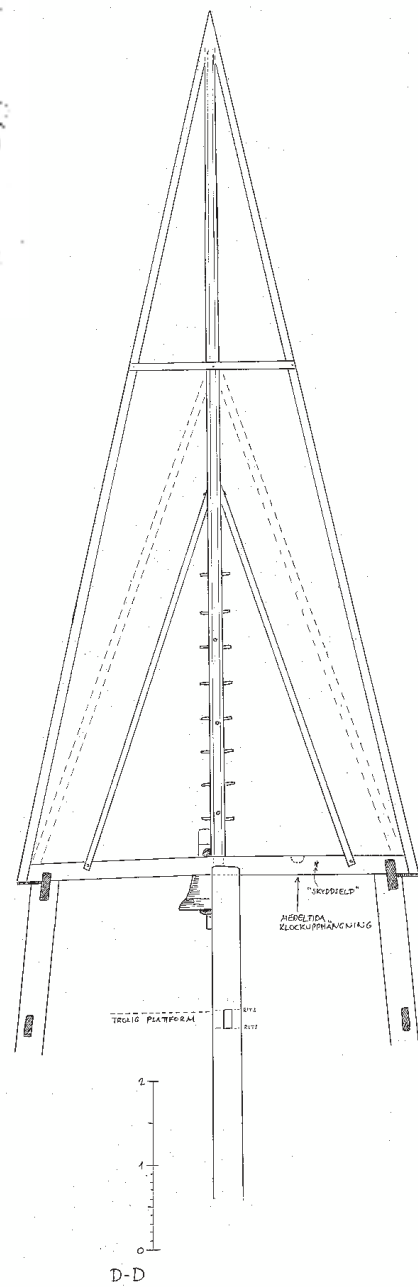

17"x16"- 14"x14" in two days work.
From 2000kg to 1100kg.

Brevik bell tower ca1325

Brevik bell tower dating 1325

Robin Gullbrandsson, Västergötlands museum

Tunna streckade linjer = senare kompletteringar

One leg was in desperat need for care..

Concrete is no good..

The legs are 11m long and in the future we will repair all legs in a more controlled way without concrete !

St Levene bell tower 1624 ? Or older..

St Levene Church tower 26m high built 1624, using the
older freestanding bell tower, maybe medieval?

In Levene forrest area, oak-beam-trees has been growing since medieval times !
Ready to use for timber framing

14 surfaces to fit this brace in the corner. We only had ONE piece of timber left to use, One try..

Ransberg bell tower 1390

In 1666 the original sills were rotten and secondary out and inside sills were added. Then in 1950 concrete made a perfect solution.. or not..

S Lundby bell tower 1750

St Lundby bell tower

St Lundby bell tower built ca 1750 all in oak.

Roof construction made of crooked branches using what you have around you.

This was one of the last hand ringed bell towers in Skara Dioceses.
